EXPERIENCE

Founder, Content Creator and Animator | AKVerse (YouTube and Instagram), Jaipur **Dec 2024 – Present**

youtube.com/@AKVerseOfficial

- Grew a creator brand to 21,000+ YouTube subscribers and 4,500+ Instagram followers with storytelling-led long-form and short-form video.
- Created original series (Kaleshi Family mini-drama, Dr Lodha reels) inspired by Panchayat and TMKOC, writing Hinglish scripts with hooks, cold opens and cliffhangers to lift audience retention.
- Wrote a full SEO pack for every upload (titles, descriptions, tags, hashtags) to grow search discovery on YouTube and Instagram.
- Built an AI-assisted production workflow (script, image, video, captions, After Effects, Premiere Pro) and automated YouTube Shorts with the Claude API, edge-tts, Blender and FFmpeg, shortening the publishing cycle.
- Designed the brand's visual identity: 3D Blender dioramas, recurring characters, animated title cards and thumbnails; published 3D asset packs on Sketchfab.

Founder, Product and Growth | Arthis Technologies (ARTHIS.space, Arthis.Land), Jaipur **Jun 2026 – Present**

arthis.space | arthis.land

- Led brand, launch and growth of ARTHIS.space, a swipeable feed of 70+ browser games, scaling it from 1 to 10,000 daily active users.
- Planned and ran promotional campaigns, tracking traffic and engagement with Google Analytics and Google Search Console.
- Launched Android and iOS apps with a short-video style game feed built for engagement, monetized with AdMob.
- Gave 70+ games one visual identity with a 2-colour key-art system (logo and 3 story banners each) in ComfyUI.
- Managed brand decisions across 3 products, including app renames (Dotspace, DotLand), launcher icon redesigns and a trademark-safe game rename.
- Built landing and download pages for both websites, prepared them for Google AdSense, and turned my GitHub contribution graph into a playable game as a personal-brand hook.

Backend Developer Intern (AI) | Clymora, Jaipur **Jan 2026 – Jun 2026**

- Shipped 6 AI-powered API features used by 4,500+ users at 99.8% uptime in a 4-person Agile team.
- Cut response time by 40% at 9,000 peak daily requests, a technical base for analytics and marketing automation.
